

# How COVID-19 Infections Have Spread

☀ Hospitality service without masks in a night club serving alcohol.

⚡ **48 people infected, including customers, staff & family of staff**

☀ Workers in a factory were wearing masks when working, but **they were not wearing masks when they ate with their coworkers or when they ate/spoke in the dormitory room in which multiple people lived.**

⚡ **29 people infected, including 17 workers and 12 friends/family of workers**

☀ Relatives and friends gathered together to eat, and **while eating they chatted without masks.**

⚡ **10 people infected, including 6 people in 2 families, 3 friends and 1 other related person**

**talking without wearing a mask (bad!)**

**chatting while eating (bad!)**

➡ **increase the risk of infection!**

Drinking alcohol can cause you to

**get louder (bad!)**

**chat more (bad!)**

**easier for people to get infected!**

If you are infected,  
you must reside in a hospital or recuperation facility until you recover.

**You will not be able to go to work! You may lose your income!**

So, we all need to work together to

**prevent infection through**

**masks, hand-washing and social distancing!**
